Let's Celebrate Inclusive Schools Week

Introduction

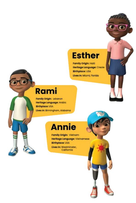
Lexia® English Language Development® is an adaptive blended learning speaking and listening program that supports students' English language development through academic conversations.

Lexia ENGLISH™ LANGUAGE DEVELOPMENT

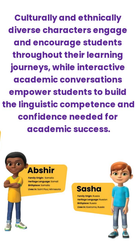
Empowering Emergent Bilinguals to Thrive

In Lexia English, students progress linguistically and academically at their own pace, thanks to the program's embedded Speech Recognition Technology. It provides immediate, guided, corrective feedback against the backdrop of an encouraging and nonjudgmental environment with respect for heritage culture and language.

Embracing an asset-model mindset, Lexia English helps instill confidence in Emergent Bilingual learners, creating a more inclusive classroom for all.



Culturally and ethnically diverse characters engage and encourage students throughout their learning journeys, while interactive academic conversations empower students to build the linguistic competence and confidence needed for academic success.



Let's get talking with Lexia English Language Development!

Lexia English and New York NYSESLAT Targets of Measurement Alignment

Scope and Sequence: NY ESL Language Proficiency Standards

Why Educators Love Lexia English

Statewide Progress in Language Development

Lexia English is designed to help Emergent Bilingual students, also known as ELLs, acquire higher language proficiency levels of English. It integrates three key areas—speaking, listening, and grammar—while emphasizing the language of content in math, science, social studies, general knowledge, and biographies, so that students gain both language skills and subject knowledge.

Over **6631** **students** in grades K-6 used Lexia English across **173 schools** in New York.

Across the school year, these students engaged in **150,000** **conversations** with the Lexia English characters, amounting to over **10,700 hours of independent practice** in academic conversations.

These students demonstrated their knowledge on **43060** **Presentations of Knowledge**, providing educators with ongoing data to inform targeted instruction.

39% **of these students** moved a proficiency band.
