

Making the Case for Lexia Learning Meeting 4 Key Objectives

Does your district have unspent CARES Act funds? If so, why not support your students' literacy needs and counteract the "COVID slide" in reading proficiency by investing in Lexia's adaptive literacy programs? In addition to meeting the following key objectives, these blended learning programs are research-proven, aligned to federal and state learning standards, and based on the Science of Reading.

1 Flexible, easy transition between learning models

Lexia's comprehensive literacy programs fit within your existing curriculum to support students in the classroom, virtually, or through hybrid learning models. These research-proven programs transition seamlessly between in-person and remote instruction with no disruption in student progress or monitoring, and teachers and administrators are always able to access student data—no matter where learning takes place.

2 Meaningful, ongoing teacher support from literacy experts

Lexia affirms the teacher's role in the blended learning environment by providing literacy support that enhances the combination of online and offline learning. Lexia is an easy lift for teachers thanks to the Customer Success team, which provides professional development in various models with multiple touch points throughout the year, and Lexia Academy®, which provides self-paced and professional learning modules on the Science of Reading and more.

3 Personalized learning paths to achieve equity

With adaptive learning paths and explicit scaffolded instruction, Lexia's programs accelerate student learning with a focus on skill gaps—regardless of whether students are learning at school or at home. Lexia provides teachers with online and offline resources for the personalized instruction required to address equity issues magnified by remote learning. Ultimately, students get the exact instruction they need to be successful learners and meet learning objectives.

4 Assessment without testing

Teachers need data, and Lexia's patented Assessment Without Testing® takes the guesswork out of differentiated instruction by providing appropriate interventions as required. Teachers have confidence that Lexia's research-proven literacy programs can identify skill gaps and personalize instruction to get students back on level and working toward proficiency.

Finding a literacy program that engages students, assesses progress, and is accessible and adaptable is challenging in any circumstance. Our literacy experts are here to help you find the right solution that works for you, your teachers, and your students.
