Virginia SOL Scores Improve Alongside PowerUp Use

One Virginia division shows that science-based literacy interventions WORK. With Lexia® PowerUp Literacy®, educators accelerated learning for their adolescent learners. See the growth students achieved in a single year.

PowerUp is split into three strands:

Word Study, **Grammar**, and **Comprehension**.

PROVEN INDICATORS FOR END-OF-YEAR SUCCESS:

- ✓ Students working on higher levels in PowerUp are likely to have higher scores on the VA Standards of Learning (SOL) Reading assessment, with an overall correlation of 0.63*.
- ✓ There was also a strong alignment between reaching the advanced zone of one or more strands in PowerUp and passing the VA SOL Reading test.

**Correlations of 0.35 and greater are considered strong. $p < .001$*

ON THE LIST

PowerUp is
VDOE-approved for
VLA 6–8 Intervention
and Supplemental
Programs.

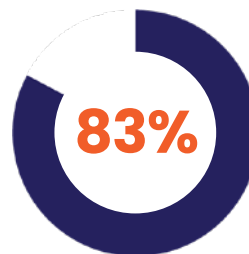

STUDY SAMPLE

Large urban division

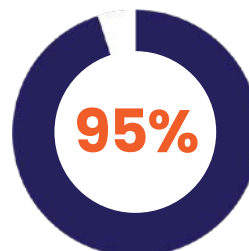

- 2,500 students
- Grades 6–8
- 2022–2023 school year
