

Beyond Intervention: Improving Adolescent Student Literacy

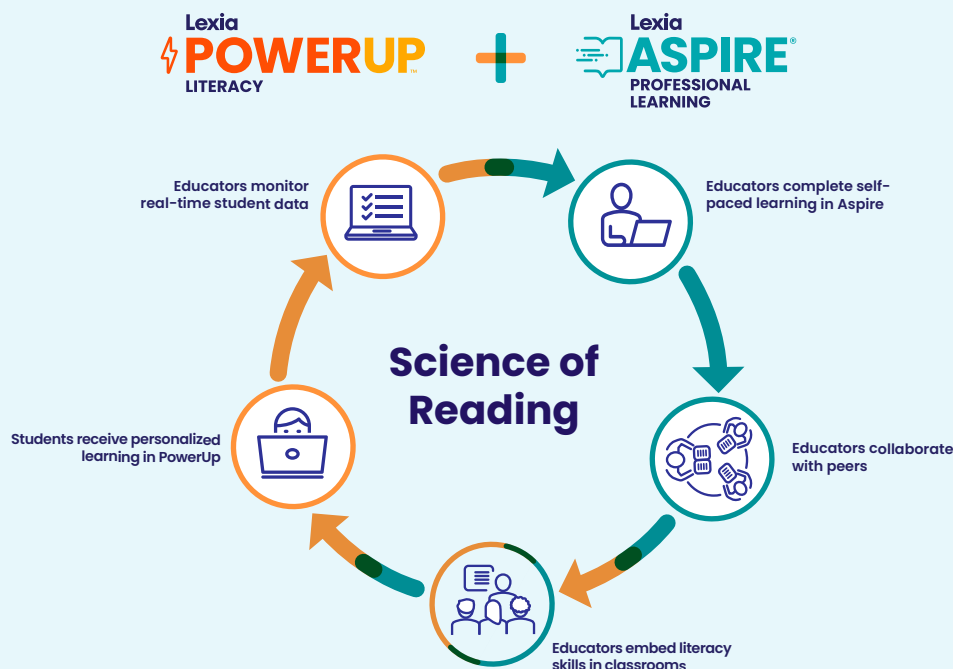

Lexia Aspire® Professional Learning empowers secondary teachers to reinforce literacy skills in concert with content instruction, ensuring students receive the instructional support they need to master content-specific vocabulary and increased text complexity across subject areas.

Aspire Helps Educators Improve Content Area Understanding

- ✓ Connects the importance of literacy in content area learning
- ✓ Offers a common understanding of the science of reading
- ✓ Reinforces literacy skills in every classroom, not just in intervention
- ✓ Focuses on the educator and emphasizes flexibility, choice, agency, and personalization
- ✓ Aligns with the Lexia® PowerUp Literacy® curriculum, improving intervention outcomes

Like PowerUp, Aspire's 30+ professional learning courses are aligned to the science of reading, facilitating reading growth through more effective instructional support.

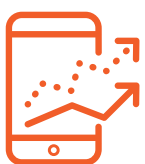

Improved Adolescent Literacy

With Aspire and PowerUp, teachers have the knowledge and the resources they need to teach kids not only to learn to read, but read to learn."

– Renee Hesson, Supervisor of Instruction for Secondary English & Fine Arts

More effective first-time instruction can accelerate student progress in PowerUp and reduce time needed in intervention, saving district resources.

“We can infuse explicit literacy instruction across the curriculum in content area classes, accelerating student learning and growth in the Lexia PowerUp Domains.”

– Tiffany Goodman, Director of MTSS

When teachers can reinforce what students learn in intervention, it improves retention and real-world application of literacy skills.

“How does literacy look in math? How does it look in science? Because it looks different in different subject areas across the curriculum. [Aspire] will help us infuse literacy into every content area.”

– Tiffany Goodman, Director of MTSS
