

Supercharging Literacy

Research Proves Core5 and Lexia English are Better Together

You already implement Lexia® Core5® Reading for reading development, focusing on critical areas like phonics, vocabulary, and comprehension. When you supercharge that with academic English Language practice through Lexia English Language Development™, multilingual learners' scores will soar.

A Powerful Partnership

A study exploring literacy and language outcomes for multilingual learners using Lexia English and Core5 bore striking results:

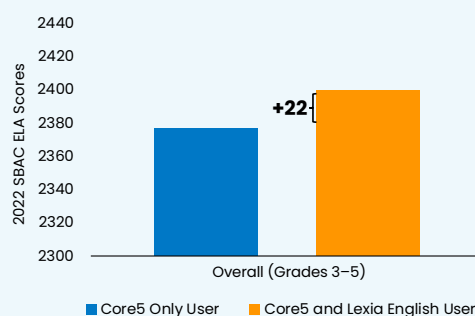

- **Higher ELA Scores:** Students using both Core5 and Lexia English scored 22 points higher on the Smarter Balanced English Language Arts (SBAC ELA) assessment than those only using Core5. This indicates significantly stronger overall ELA achievement.
- **Increased Proficiency:** Students using both programs had significantly higher SBAC ELA proficiency levels—23% achieved proficiency compared to 14% for Core5-only users. That's more than **1.5x** the proficiency rate!
- **Enhanced Language Skills:** The combined use of Core5 and Lexia English yielded the highest impact (**0.34 effect size**) on the overall California English Language Proficiency Assessment (ELPAC), demonstrating the substantial growth in speaking, listening, and grammar that Lexia English directly targets.

Why This Matters

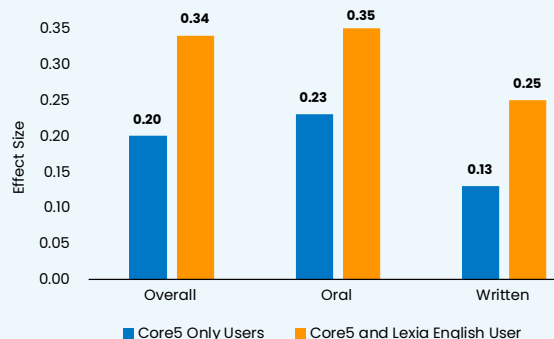

[Oral language development](#) is fundamental to strong literacy skills. While Core5 builds essential reading abilities, Lexia English develops the speaking, listening, and grammar skills critical to multilingual learners' overall English proficiency and academic success.

Data from Lexia Research, [quasi-experimental study](#)

Students using Core5 and Lexia English scored higher on the SBAC.

Use of Core5 and Lexia English together had the biggest impact on ELPAC scores.

**The research is clear.
Maximize your students' potential.**
