

# Key Takeaways

Three sessions. Real strategies for your classroom.

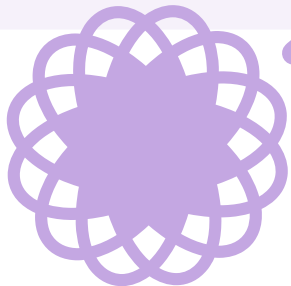

Lexia®  
Science of  
Reading Week  
Every Student. Every Step.

- Strong literacy systems mean **you don't have to carry student outcomes alone.** When your school's training, coaching, and tools are aligned, your instruction goes further.
- 8,930 students across Loudoun County, Virginia, showed measurable growth with Lexia® PowerUp Literacy®, proving that **adolescent literacy gains are achievable with the right support behind teachers.**
- **The right AI gives you time back.** Instead of managing data for 25+ students, you can focus on relationships, instruction, and the professional judgment that matters most.

“

There needs to be ongoing dialogue about how we bridge the chasm between what we know from research and what needs to happen in the schools.”

– Michelle Picard, Ed.D.,  
Loudoun County School District,  
New York
