# Alabama School Goes from 'Full Support' to 'Science of Reading Spotlight School'

This year, Central Elementary School, part of Tuscaloosa City Schools, was named a “Science of Reading Spotlight School” by the Alabama Department of Education—a recognition bestowed on just 12 schools in Alabama each year. This is a major accomplishment for a district where just 15% of its kindergarten students were proficient in reading during fall 2021.

“We attribute this success to our teachers and the science of reading,” said Jerry Collins, Ph.D., principal at Central Elementary School. “With the science of reading as our guide, the sky is the limit for us.”

With the science of reading as our guide, the sky is the limit for us.”

—Jerry Collins, Ph.D., principal at Central Elementary School

## From Walking to Flying

In 2018, Central Elementary was deemed a “full support school” based on its students’ test scores. Collins took over as principal shortly after that and began looking for ways to get more of the school’s students reading successfully by third grade—a requirement of Alabama’s Literacy Act.

When Collins learned about Lexia LETRS® (Language Essentials for Teachers of Reading and Spelling) Suite, he was immediately interested. Developed by a trio of literacy experts, Lexia LETRS is a flexible literacy professional learning solution for educators and administrators. It teaches the skills needed to master the fundamentals of reading instruction—phonological awareness, phonics, fluency, vocabulary, comprehension, writing, and language.

“I initially heard about Lexia LETRS from my mentor principal at the state department, which establishes the specific benchmarks that Alabama schools have to reach,” Collins said. “Lexia LETRS was one of the offerings to help teachers and to address some of our students’ learning difficulties.”

Taking the position that being a full support school “described us but did not define Central Elementary School,” Collins got all educators onboard with Lexia LETRS. After completing the program’s administrative component, he jumped into the teacher’s portion along with his staff. “Now,” he added, “our entire staff of 22 is working through the program.”

## 100% Buy-In

Working with a representative from Lexia LETRS, Collins and his reading coach scheduled several professional training sessions. And on the days specific teachers had training, they could either come to the school or do the virtual training from home. Once the initial four teachers completed the program, they served as a support team for other instructors.

“We have 100% buy-in here,” said Collins, who impresses upon all new teachers the fact that he and his team will “teach them how to teach,” with Lexia LETRS playing an important role in that process. The approach is clearly working, based on the impressive reading gains Central Elementary’s kindergarten students have made during the last few semesters.

“Of the kindergarten students who are going into first grade now—and despite COVID and learning loss—more than 74% are proficient in reading,” Collins said. The remaining students attended summer school for remediation and additional support.

“Every grade level made gains for the last two years,” Collins said, “and we’re all excited about year three.”

## LETRS Levels the Playing Field

Collins sees Lexia LETRS as a good tool for combatting the learning loss many students experienced as a result of the COVID pandemic. It also helps to bring teachers “up to speed” and focus on Tier 1 readers. “Lexia LETRS gives us the resources we need to get the kids ready to do the work,” said Collins, who especially likes the platform’s expansive video library and science of reading approach.

To other school leaders who want to help level the playing field for students on the reading front, Collins said to “jump in 100%” to Lexia LETRS and the science of reading. “If you want your teachers to get onboard and use it, it starts with the leaders,” Collins said. “From there, everything else will fall into place.”

Collins also tells other principals and leaders to experience Lexia LETRS for themselves first, before getting teachers and staff involved. “I did Lexia LETRS first myself because I would never expect our teachers to do something that I wouldn’t do,” Collins said. “It also gave me the language I needed to be able to ‘talk the talk’ with them.”

Lexia®, a Cambium Learning Group company, is a leader in science of reading-based solutions. For 40 years, the company has focused on pre-K-12 literacy and today provides solutions for every student and educator. With a complete offering of professional learning, curriculum, and embedded assessment, Lexia helps more learners read, write, and speak with confidence.
