

## Are Your Reading Academies Done? What Comes Next?

We know you have just completed your coursework for the Reading Academies and may be wondering: What next? Lexia Learning understands that acquiring deep knowledge of reading instruction takes time. Our belief is that it's not "one and done" but "with one, we have just begun." This is where LETRS® continues the professional learning journey that the Texas Reading Academies have begun.

LETRS enhances the efficacy of Texas Reading Academies

## What Is LETRS?

The LETRS (Language Essentials for Teachers of Reading and Spelling) Suite is comprehensive professional learning designed to provide educators and administrators with deep knowledge in the science of reading.

Chosen by many states, LETRS is an **empowering premier course of study** with practical ways to apply learning to the classroom every day.

LETRS teaches the skills needed to master the foundation and fundamentals of reading and writing instruction: **phonological awareness, phonics, fluency, vocabulary, comprehension, and written language.**

## Why Implement LETRS?

LETRS answers the important questions of **what** skills are required for reading and writing, **how** to teach these skills, and the science behind **why** these skills are critical to students' reading and writing success.

The recommended model for implementing LETRS is the guided implementation model. This includes support from Lexia's Customer Success team for implementation planning, onboarding, and ongoing coaching. With LETRS, you receive **live training and support** from literacy experts with strong knowledge in science of reading-based foundational literacy instruction.

LETRS is composed of units of learning, with each unit organized around four components that take deep, meaningful research and bridge that research into practice in the classroom: LETRS **Online Learning Platform**, LETRS **Bridge to Practice**, LETRS **Participant Manual**, and LETRS **Professional Learning Unit Trainings**.
